

I benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. I also believe that having this service available to me while I'm driving allows me to avoid congested areas and ultimately makes for safer driving. Also I pay for these services and it should not be up to the National Association of Broadcasters to dictate what i'm permitted to hear. Respectfully I urge you to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I've made a decision to purchase based on it's content.
